Brend: CHERRY - XTRFY
Zaliha: Na skladištu

Kratak opis

THE ULTRA-CUSTOMIZABLE K5. VERSION 2.

- One of the most customizable keyboards in the world – now the first gaming keyboard to be equipped with CHERRY MX2A switches. K5V2 is the next level in design and performance.

CHERRY MX2A RED SWITCHES.

- The world's most trusted mechanical keyboard switch just got better. CHERRY MX2A is a transformative upgrade to the CHERRY MX – used in more than 60 million keyboards worldwide. With precisely applied premium-grade lubricant and a new innovative spring design, the MX2A brings you smoother actuation, improved acoustics, and a lifespan of 100 million keystrokes. And if you'd like to try different switch characteristics to find the perfect touch and feel, the switches are hot-swappable so you can easily replace them – no soldering required.

CUSTOMIZE EVERYTHING.

- Customizing your keyboard has never been easier. On the K5V2, everything from the switches, stabilizers and keycaps to the cable, frame and even the little plate for the logo is swappable.

65% SIZE.

- This keyboard comes in a 65% format – bringing you an extremely compact design without sacrificing the convenience of arrow keys.

HOW TO GET FASTER: SUPER-SCAN TECHNOLOGY.

- Your keyboard is never faster than its ability to detect your keystrokes – no matter how many times per second it reports to the computer (Polling rate). The K5V2 features a new super-scan technology, scanning all keys every half a millisecond.

UNBELIEVABLE RGB.

- The best RGB experience we've had" said one of the UK's largest tech review sites about the previous generation of Xtrfy keyboards. On the K5, we've developed the RGB implementation even further to bring you a more impactful illumination than ever. Connecting the keyboard to a USB 3 port? Switch to USB 3 mode to boost the RGB!

OUR SMALLEST BUT MOST ADVANCED KEYBOARD YET.

- Small doesn't mean less. This keyboard is extremely compact yet fully featured, with per-key customizable RGB illumination, macros, media controls and more. All settings are made using the keys. No software needed.

BUILD QUALITY ON A NEW LEVEL.

- Feel. Sound. Durability. It all comes down to build quality. The K5 is built with a metal plate construction, double layers of sound-dampening foam and high-quality PCB-mounted stabilizers – pre-lubed by hand.

Specifications

Dimensions & Weight

- Length without packaging: 325 mm
- Width without packaging: 110 mm
- Height without packaging: 37 mm

Support

- Warranty: 2 years warranty

Technical data (keyboard)

- Keycap material: ABS
- Special key functions: Unmute/Mute, Volume up, Volume down, FN Key, Illumination settings, Media controls, Play/Pause
- Key technology: Mechanical
- Status LEDs: in housing
- Adjustable feet: integrated
- Anti-ghosting: yes
- Response time: 1 ms
- Keyboard format: Compact (65%)
- N-Key Rollover: yes
- Hotswap: yes

Connection (cable)

- Cable length 200 cm
-
