Synology DS225+ DiskStation 2-bay All-in-1 NAS server, 2.5"/3.5" HDD/SSD podrška, Hot Swappable HDD, 2GB, 1x2.5GbE, 1x1GbE, 2xUSB 3.2 Gen 1 Port

Kategorija: [Synology](#)

Dobavlјivost: **predviđena dostava 30.09.2025**

Šifra: **175351**

Cijena: 478,00€

Brend: SYNOLOGY
Zaliha: Na skladištu

Kratak opis

Samo za Synology diskove!!! The Synology DiskStation DS225+ is a compact 2-bay NAS solution designed to centralize data management, offering a comprehensive suite of tools through Synology DiskStation Manager (DSM) for managing, sharing, and protecting files and photos, backing up devices and data, and serving as the core of a smart surveillance system. Balanced, reliable architecture Powered by a quad-core Intel Celeron J4125 processor running at 2.0 GHz to 2.7 GHz in Burst mode, the DS225+ provides a stable foundation for everyday tasks, multimedia and productivity. With 2 GB of soldered DDR4 RAM, expandable via a SODIMM slot up to 6 GB, it meets performance needs in a scalable way. This configuration delivers stable transfer rates (~280 MB/s read, ~210 MB/s write) while keeping power consumption low (around 14 W idle and 26 W under load). So your back-ups remain fast without consuming too much power or generating too much noise. High-speed connectivity At the cutting edge of modern networking, the DS225+ offers a 2.5 GbE port and a 1 GbE port: a real plus over the previous model. This connectivity enables local transfers up to twice as fast, ideal for HD video, file synchronisation and network backup. It also has two USB 3.2 Gen 1 (5 Gb/s) ports, on the front and rear, for connecting external drives or printers. Although the DS225+ does not offer an M.2 slot or PCIe port, it can accommodate the DX525 expansion module via USB-C, adding up to 5 bays as required. Key features : Intel Celeron J4125 processor: quad-core 2.0 - 2.7 GHz 2 GB DDR4 memory: expandable up to 6 GB 2 SATA bays: compatible with 2.5" & 3.5" HDD/SSDs RAID 0/1, JBOD: for performance or security Multispeed network: 2.5 GbE + 1 GbE USB 3.2 Gen 1 front + rear: 5 Gb/s each No M.2 or PCIe: but can be extended via DX525 USB-C DSM with integrated apps: Drive, Backup, Surveillance, etc. Disk compatibility required: Synology or certified disks
