## Kratak opis

- The semi-modular power supplies of the X+ series are capable of absorbing high load peaks above the normal rated power in the shortest possible time and comply with Intel's Design Guide 3.0. Thus, the power supplies are ideally suited for driving the latest and most powerful gaming graphics cards with PCI Express 5 specifications. An 80+ Gold certification confirms a high efficiency and energy efficiency of this power supply series. Six different protection circuits (OCP, OVP, UVP, SCP, OPP, OTP) ensure safe operation even in heated gaming sessions. The fans of the ATX 3.0 power supplies run with Fluid Dynamic Bearing technology and are very quiet. In addition, they convince with an extremely long durability and their excellent cooling performance. All of these specifications make the affordable Performance X+ series ideal for use with the latest gaming PC systems.
